Traumtür-Konfigurator unter bertrand-en.traumtuer-konfigurator.de öffnen oder QR-Code scannen!

Simply scan!

In our premium entrance door model selection, you will find QR codes with which you can call up further interesting information, for example on model variants, interior views, detailed images or the manufacture of your entrance door. Simply scan them with your cell phone or tablet and let them inspire you!

Further model variants

Call up information on other model variants (e.g. frame shapes, variants of pilaster strips, surfaces, glazing) and convince yourself of our diversity.

Close-ups

With attention to detail – here you will find model dependent close ups as well as enlargements.

Interior View

What does my entrance door actually look like from the inside and which variants can I choose! Let our interior views inspire you.

Video footage

We provide insights into the manufacture of your front door.

Modern accents with pilaster strips

Choose between flush pilaster strips in a stainless-steel or black-steel look to give your new entrance door an individual character.

Reclaimed wood design

The design surfaces refined using a special printing method are available in two different, natural wood textures. Pilaster strips or applications in a black-steel look also give your new entrance door a modern and high-quality look.

Ceramic

Our scratch-resistant and easy-care ceramic surfaces are made from natural raw materials. Deviations in color, shape and surface are therefore unavoidable and do not represent a defect, but rather emphasize the natural character. The different color pigments can vary depending on the batch and incidence of light. Each entrance door is therefore unique.

Art-Beton

Concrete look, concrete haptic and yet no concrete.

Art-concrete is a modern composite material made from a flexible mineral base with natural marble components, much lighter than concrete and therefore flexible to use. Front doors with an art concrete door panel give the facade a unique ambience. Each one is unique. Different surface structures are possible.
